

Toronto and Region Conservation

COMMUNITY WORKING SESSION #2

Don Mouth Naturalization and Port Lands Flood Protection Project

Toronto and Region Conservation (TRCA) has commenced the Don Mouth Naturalization and Port Lands Flood Protection Project. Ultimately this project will develop a preferred alternative that will transform the existing mouth of the Don River including the Keating Channel into a healthier, more natural river outlet to the lake, while at the same time, removing the risk of flooding to 230 hectares of urban land to the east and south of the river. This project is a key component of the Toronto Waterfront Revitalization Corporation's mandate to renew and revitalize Toronto's waterfront.

This project is subject to the requirements of the *Ontario Environmental Assessment Act* as an Individual Environmental Assessment (EA). We are currently developing a Terms of Reference which is the first step of an Individual EA. This project is also subject to the requirements of the *Canadian Environmental Assessment Act*.

You can participate in this exciting project by attending our
Working Session

Tuesday, August 23, 2005 • 6:30 pm – 9:00 pm

Ralph Thornton Centre, 765 Queen Street East, Toronto
