CONSTRUCTION NOTICE #7: Port Lands Flood Protection

Partial Lane Closures: Thursday November 8 – Friday November 23

From November 8 to 23 between the hours of 7:00 a.m. - 7:00 p.m. from Monday to Saturday, crews will be working on the following locations:

- The Don Roadway (between Villiers Street & Commissioners)
- Cherry Street (from Commissioners Street to Polson Street)
- Commissioners Street (from Cherry Street to Saulter Street South)
- Villiers Street (at and west of The Don Roadway)

One lane of traffic will be opened in each direction at all times. Traffic control will always be present while crews are working on the road to ensure access to properties.

These closures will allow crews to drill geotechnical boreholes on Don Roadway, Villiers Street, Cherry Street and Commissioners Street to inform the design of the new roadways and new bridges. Find details about what we're building as part of Port Lands Flood Protection [here](#).

PORT LANDS FLOOD PROTECTION – PROGRESS UPDATE

What to expect this fall

Construction crews are continuing with the demolition of the asphalt and concrete parking lot and buildings on the site at the intersection of Commissioners and Cherry Streets. There will also be topsoil scrapped and stockpiled, site grading, installation of drainage and sediment and erosion control measures, environmental and geotechnical drilling on roads and boulevards, and surveying.

This map shows the areas where work has started and will continue through December 2019.

Area 1:

- Demolition
- Stockpiling topsoil removed from elsewhere on-site

Area 2:

- Demolition

Area 3:

- Demolition
- Preparing for river excavation (removal of the topsoil)

In addition to these activities, crews will be excavating swales (ditches) on the site to contain water run-off.

The construction crew is stockpiling the top soil on-site.

CHERRY STREET LAKEFILLING – PROGRESS UPDATE

The latest aerial image of the Cherry Street Lakefilling project, showing the new shoreline taking shape, lakefilling progress on the south side of Essroc Quay and dockwall progress to the north.

Lakefilling continues (left). A total of 19,560 truckloads of locally sourced clean fill, that will form the northwest corner of Villiers Island. The dock wall construction continues (right). The crew is placing rebar and forming the cap beam.
